

MEMBER BENEFITS

ASK YOURSELF...

- Do you keep up-to-date on all commercial construction industry trends and have a reliable source for definitive answers on important issues?
- Do you have a strong advocate on the state and federal level?
- Are you looking to network and share your knowledge with other industry leaders?

With over 70 years as a full service trade association providing lobbying services, publications, discount programs, and networking, AGC of NH continually works to fulfill its mission and meet the needs of its members. Member-driven committees and partnerships with like-minded coalitions give additional support to the association.

Working directly with state agencies and legislative leaders, AGC of NH is able to make a difference in the industry on a state level. Nationally, the association is part of a network of country-wide chapters that make up the AGC of America, which serves the industry on a national level. The national and state organizations make a powerful combination whose actions reduce regulatory burdens, improve contractors' bottom lines, and make the voice of member firms heard.

LEGISLATIVE INFLUENCE

AGC of NH understands the needs of the industry, and has the ability to voice those needs to agency leaders, political leaders, and other important figureheads. AGC of NH has formed relationships with these leaders, which has placed the Association as the go-to voice of the construction industry, particularly at the State House.

By professionally and effectively representing the interests and concerns of contractors, AGC of NH works to ensure that government fully understands the needs of the construction industry. Additionally, because AGC of NH is driven by its members, it's the members who decide which are most important each year.

I have testified before the Legislature with AGC and have seen, first-hand, the respect AGC has with Legislators and other business organizations which is so impressive. This has all come about by having a presence at the State House for decades.

*Amy Charbonneau, Continental Paving
AGC Highway Director*

ESTIMATED ROI

"Two years ago I recommended the association fix the third party building review process that gave the contractor or developer no say in the scope of the review or the costs to the builder. Last year, AGC passed a law allowing the builder or developer to have a say in the process."

Art Rose, AW Rose Construction & Current AGC of NH President

AGC of NH committees are a crucial part of the Association's lobbying efforts. Member driven, the committees make decisions on which bills to support, oppose, and monitor as well as offer their expertise in topic specific areas. Joining a committee is a great way to expand your membership experience and become active in the Association's legislative actions.

BUILDING CODES

AGC of New Hampshire was instrumental in getting the state-wide building codes adopted in the early 1990's. To date, AGC is actively working with the legislature to update the codes in 2022.

HIGHWAY INFRASTRUCTURE

Over the past year, AGC of New Hampshire and its national organization worked tirelessly for the passage of the Federal Infrastructure Act which has raised more money for New Hampshire than any of the past reauthorizations.

PRIME WETLAND EXPANSION

Over the last four years, the legislature has attempted to expand the definition of prime wetlands, which would make it very difficult for future development in New Hampshire. Each year, the association has opposed the bill to protect the industry from unnecessary regulation.
