

TESTIMONIALS

AGC truly represents the construction industry before the legislature. The association presents over one hundred bills each year for the Board and its members to take a position. The association prides itself in getting input from the membership on an array of issues.

Ron Ciotti
Hinkley Allen, AGC Legislative Committee Chairman

Committees are a strong part of the association. AGC has had a long-standing relationship with state agencies that I believe is unprecedented. I have served on the AGC Joint Highway Specifications Committee with the NH Department of Transportation; discussing specifications that affect my own projects. This cooperation with the state makes our specifications more workable for our industry as the NHDOT listens.

Michael Ferrari
Evroks Corporation, AGC Highway Director

My company has taken advantage of the AGC Discount Programs; saving me more than the total cost of my membership dues in some years.

Ryan Audley
R.S. Audley, Inc.
AGC Senior Vice President

I have testified before the Legislature with AGC and have seen, first-hand, the respect AGC has with Legislators and other business organizations which is so impressive. This has all come about by having a presence at the State House for decades.

Amy Charbonneau
Continental Paving, AGC Highway Director

Two years ago I recommended the association fix the third party building review process which gave the contractor or developer no say in the scope of the review and the associated cost to the builder. Last year, AGC passed a law allowing the builder or developer to have a say in the process.

Art Rose
AW Rose Construction, Current AGC of NH President
